

WISC-V* CPD Seminar, Friday 15 September 2017

(extended training opportunities outlined below)

Information & Registration Details

Mylne Street Mental Health Pty. Ltd. is a private psychology practice centrally located in Toowoomba, south-east Queensland, approximately a 2 hour drive from Brisbane Airport and 20 minute drive from Brisbane West Wellcamp Airport. The Clinical Director, Michelle Aniftos, is a Clinical Psychologist and Accredited Supervisor who is experienced in test administration and interpretation and also in providing training and supervision on this topic.

This CPD Seminar will refresh your knowledge of cognitive assessment and interpretation via the popular Wechsler Intelligence Scale for Children; and will update practitioners regarding the recently released WISC-V Aus/NZ Edition.

Intended Audience:

- Psychologists seeking introductory training in implementation of the WISC-V
- Other professionals with responsibility for test administration and interpretation who have access to appropriate permissions and supervision for test administration.

N.B. The WISC-V is a registered test which requires a high level of expertise. It is expected that participants in this training opportunity will have at least provisional registration as a psychologist OR at least a master degree in psychology, education, or closely related field with formal training in the ethical administration, scoring, and interpretation of clinical assessments related to the intended use of the assessment. It is also expected that participants will access clinical supervision by an accredited psychologist to ensure that minimum competencies are developed and maintained.

Program Objectives:

- To address *Intellectual Assessment* as a core competency for Australian psychologists
- To provide a sound framework of knowledge about assessment practices
- To develop competency in test administration, scoring and interpretation
- To encourage self-critical and self-reflective evaluations of skill development

8.30am:	Registration & Introductions
9 – 10:	Cognitive assessment in clinical practice
10 - 11:	The WISC-V Factors & Subtests
11.30 – 1.30:	Test Administration
2 – 3.30:	Scoring & Interpretation
4 – 5pm:	Case studies in developmental difficulties, disorder, and diagnosis.

Extended Training, 9am – 1pm Saturday 16th September

Following the Friday didactic training, participants will have an opportunity for hands-on administration, scoring & interpretation of the WISC-V. **Advanced bookings essential.**

Post-workshop Supervision

Following initial training, participants will practise administration of the WISC-V (or WISC-IV) in their own place of study or work. They will have access to online/telephone supervision and support in order to prepare and submit at least two sample reports for final assessment. Participants may have to resubmit reports following supervision in order to attain a 'final report' of an appropriate standard. Once the participant has finalised the written reports, two case studies must be presented to the trainer either in face-to-face (in person or online). This work usually involves 4 – 6 hours of clinical supervision.

* Wechsler, D. (2016). Wechsler Intelligence Scale for Children—Fifth Edition (WISC-V A&NZ). San Antonio, TX: The Psychological Corporation.
